SIDDHARTHA INSTITUTE OF TECHNOLOGY & SCIENCES

CONTENTS

S.No	Description	Page No.
1	Vision & Mission of the Institute	i
2	Vision & Mission of the Department	ii
3	Program Outcomes	iii
4	Rules and Regulations of Lab	iv
5	Basic Operations on Matrices.	1
6	Generation of Various Signals and Sequences (Periodic and Non periodic), such as Unit Impulse, Unit Step, Square, Saw tooth, Triangular, Sinusoidal, Ramp, Sinc.	5
7	Operations on Signals and Sequences such as Addition, multiplication, Scaling, Shifting, Folding, Computation of Energy and Average Power	12
8	Finding the Even and Odd parts of Signal/Sequence and Real and Imaginary parts of Signal	20
9	Convolution between Signals and sequences	25
10	Auto Correlation and Cross Correlation between Signals and Sequences	29
11	Verification of Linearity and Time Invariance Properties of a given Continuous/Discrete System	33
12	Computation of Unit sample, Unit step and Sinusoidal responses of the given LTI system and verifying its physical reliability and stability properties.	37
13	Gibbs Phenomenon	40
14	Finding the Fourier Transform of a given signal and plotting its magnitude and phase spectrum	42
15	Waveform Synthesis using Laplace Transform.	45
16	Locating the Zeros and Poles and plotting the Pole-Zero maps in S-plane and Z Plane for the given transfer function.	49
17	Generation of Gaussian noise (Real and Complex), Computation of its mean, M.S. Value and its Skew, Kurtosis, and PSD, Probability Distribution Function	53
18	Sampling Theorem Verification	55
19	Removal of noise by Autocorrelation / Cross correlation	58

20	Extraction of Periodic Signal masked by noise using Correlation	62
21	Verification of Weiner-Khinchine Relations.	66
ADDITIONAL EXPERIMENTS		
22	Generate a DTS of N=1000 i.i.d uniformly distributed random no.'s in the interval (-0.5,-0.5) and compute the autocorrelation of the seq.	67
23	Obtain and plot the power spectrum of the o/p process when a white random process is passed through a filter with specific impulse resp.	68

SIDDHARTHA INSTITUTE OF TECHNOLOGY & SCIENCES

VISION & MISSION OF THE INSTITUTE

VISION:

To be a Centre of Excellence in Technical Education and to become an epic center of Research for creative solutions.

MISSION:

To address the Emerging Needs through Quality Technical Education with an emphasis on practical skills and Advanced Research with social relevance.

OBJECTIVES:

- To translate our vision into action and accomplish our mission, we strive to provide state-of-art infrastructure.
- Recruit, Motivate and develop faculty of high caliber and with multiple specialization.
- Continuously review, innovate and experiment teaching methodologies and learning processes.
- Focus on research, training and consultancy through an Integrated Institute-Industry symbiosis.

SIDDHARTHA INSTITUTE OF TECHNOLOGY & SCIENCES

VISION & MISSION OF THE DEPARTMENT

VISION :

To provide innovative teaching and learning methodologies for excelling in a high-value career, higher education and research to the students in the field of Electronics and Communication Engineering to meet the needs of the industry and to be a part of the advancing technological revolution.

MISSION :

- To create engineers of high quality on par with international standards by providing excellent infrastructure and well qualified faculty.
- To establish centers of excellence to enhance collaborative and multidisciplinary activities to develop human and intellectual qualities.
- To provide technical expertise to carry out research and development.

PROGRAM EDUCATIONAL OBJECTIVES (PEOS) :

Graduates shall apply the fundamental, advanced and contemporary knowledge of

1. Electronics, Communication and allied Engineering, to develop efficient solutions and systems, to meet the needs of the industries and society.
2. Graduates will get employed or pursue higher studies or research.
3. Graduates will have team spirit, good communication skills and ethics with lifelong learning attitude.

SIDDHARTHA INSTITUTE OF TECHNOLOGY & SCIENCES

PROGRAM OUTCOMES:

Engineering Graduates will be able to:

1. **Engineering Knowledge:** Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
2. **Problem analysis:** Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
3. **Design/development of solutions:** Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
4. **Conduct investigations of complex problems:** Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
5. **Modern tool usage:** Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.
6. **The engineer and society:** Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
7. **Environment and sustainability:** Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
8. **Ethics:** Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
9. **Individual and team work:** Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
10. **Communication:** Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
11. **Project management and finance:** Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
12. **Life-long learning:** Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

RULES AND REGULATIONS OF LAB

All students must observe the Dress Code while in the laboratory.

-  All bags must be placed at rack.
-  The lab timetable must be strictly followed.
-  Be PUNCTUAL for your laboratory session.
-  Program/experiment must be executed within the given time.
-  Workspace must be kept clean and tidy at all time.
-  Handle the systems and interfacing kits with care.
-  All students are liable for any damage to the accessories due to their own negligence.
-  All interfacing kits connecting cables must be RETURNED if you taken from the lab supervisor.
-  Students are strictly PROHIBITED from taking out any items from the laboratory.
-  Students are NOT allowed to work alone in the laboratory without the Lab Supervisor
-  USB Ports have been disabled if you want to use USB drive consult lab supervisor.
-  Report immediately to the Lab Supervisor if any malfunction of the accessories, is there

Before leaving the lab

-  Place the chairs properly.
-  Turn off the system properly
-  Turn off the monitor.
-  Please check the laboratory notice board regularly for updates.

LIST OF EXPERIMENTS

1. Connect an LED to GPIO pin 25 and control it through command line.
2. Connect an LED to GPIO pin 24 and a Switch to GPIO 25 and control the LED with the switch.
3. The state of LED should toggle with every press of the switch Use DHT11 temperature sensor and print the temperature and humidity of the room with an interval of 15 seconds
4. Use joystick and display the direction on the screen
5. Use Light Dependent Resistor (LDR) and control an LED that should switch-on/off depending on the light.
6. Create a traffic light signal with three colored lights (Red, Orange and Green) with a duty cycle of 5-2-10 seconds.
7. Switch on and switch of a DC motor based on the position of a switch.
8. Convert an analog voltage to digital value and show it on the screen.
9. Create a door lock application using a reed switch and magnet and give a beep when the door is opened.
10. Control a 230V device (Bulb) with Raspberry Pi using a relay.
11. Control a 230V device using a threshold temperature, using temperature sensor.
12. Create an application that has three LEDs (Red, Green and white). The LEDs should follow the cycle (All Off, Red On, Green On, and White On) for each clap (use sound sensor).
13. Create a web application for the above applications wherever possible with suitable modifications to get input and to send output.
